1. ACCOUNTING POLICIES

The accounting policies summarised below have all been applied consistently throughout the current and the preceding periods

BASIS OF PREPARATION

The financial statements have been prepared under the historical cost convention and in accordance with applicable United Kingdom accounting standards

The financial statements have also been prepared on the going concern basis as discussed in the Directors' report on page 1

Under Financial Reporting Standard 1, the Company is exempt from the requirement to prepare a cash flow statement on the grounds that it is a wholly owned subsidiary undertaking and a consolidated cash flow statement is given in the financial statements of Howden Joinery Group Plc

The financial statements include the results for the 53 week period ended 29 December 2012 *(2011 52 weeks to 24 December)*, being the Saturday nearest to the Company's accounting reference date of 31 December

TURNOVER

Turnover represents the gross recharges of various corporate and Information Technology services to other Group companies Revenue is recognised on the provision of qualifying services

TANGIBLE FIXED ASSETS

Fixed assets are stated at cost net of accumulated depreciation or provision for impairment Depreciation is provided to write off the cost less any residual value of tangible fixed assets over their estimated useful lives as follows

Plant and machinery, fixtures and fittings	10% - 25% p a
Motor vehicles	20% - 25% p a
Leasehold properties	Over life of lease

Assets under the course of construction are not depreciated until such time as the asset is available for use

INVESTMENTS

Investments represent shares in the ultimate parent which are shares held by employee share ownership trusts, and are recorded at cost, including expenses, less amounts written off Amounts written off these shares are calculated so as to charge the cost of the shares to profit and loss over the vesting period of the underlying share options or awards

TAXATION

UK Corporation tax is provided at amounts expected to be paid or recovered, using tax rules and laws that have been enacted or substantively enacted by the balance sheet date

Deferred taxation is provided on a full provision basis, without discounting, on all timing differences which have arisen but not reversed at the balance sheet date Except where otherwise required by Accounting Standards no timing differences are recognised in respect of

(a) property revaluation surpluses where there is no commitment to sell the asset,
(b) gains on sale of assets where those assets have been rolled over into replacement assets, and
(c) additional tax which would arise if profits of overseas subsidiaries were distributed, and deferred tax assets to the extent that they are regarded as not likely to be recovered

A net deferred tax asset is regarded as recoverable and therefore recognised only to the extent that, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date

1. ACCOUNTING POLICIES (Cont'd)

FOREIGN CURRENCY

Transactions denominated in foreign currencies are translated into sterling and recorded at the rate of exchange ruling at the date of the transaction

Monetary assets and liabilities denominated in foreign currencies are translated into sterling at rates ruling at the balance sheet date Foreign exchange profits and losses arising during the period are included in loss on ordinary activities before taxation

LEASED ASSETS

Leases are classified as finance leases when the terms of the lease transfer substantially all the risks and rewards of ownership to the Company All other leases are classified as operating leases For property leases, the land and building elements are treated separately to determine the appropriate lease classification

Finance leases

Assets funded through finance leases are capitalised as property plant and equipment, and depreciated over their estimated useful lives or the lease term, whichever is shorter The amount capitalised is the lower of the fair value of the asset or the present value of the minimum lease payments during the lease term at the inception of the lease The resulting lease obligations are included in liabilities net of finance charges Finance costs on finance leases are charged directly to the Profit & Loss Account

Operating leases

Assets leased under operating leases are not recorded on the balance sheet Rental payments are charged directly to the Profit & Loss Account

Lease incentives

Lease incentives primarily include up-front cash payments or rent-free periods Lease incentives are capitalised and spread over the period of the lease term

Leases with predetermined fixed rental increases

The Company has a number of leases with predetermined fixed rental increases These rental increases are accounted for on a straight-line basis over the period of the lease term

PENSIONS

i) Defined benefit pension schemes

The Company participates in its parent company's Howden Joinery Group Plc group retirement benefit scheme This is a defined benefit arrangement, operating through a multi-employer defined-benefit scheme The assets and liabilities of the scheme are held separately from those of the Howden Joinery Group Plc The Company is unable to identify its share of the underlying assets and liabilities of the scheme and accordingly accounts for the scheme as if it were a defined contribution scheme This is in line with the guidance in FRS 17 relating to group defined benefit pension schemes

ii) Defined contribution pension schemes

The Howden Joinery Group Plc operates a defined contribution scheme for its employees For defined contribution schemes, the amount charged to the profit and loss account in respect of pension costs and other post-retirement benefits is the contributions payable in the year Differences between contributions payable in the year and contributions actually paid are shown as either accruals or prepayments in the balance sheet

1 ACCOUNTING POLICIES (cont'd)

SHARE-BASED PAYMENTS

FRS 20 has been applied to all grants of equity instruments after 7 November 2002 that were unvested as of 25 December 2005

The Company issues equity-settled share-based payments to certain employees, based on the shares of its ultimate parent company Howden Joinery Group Plc Equity-settled share-based payments are measured at fair value at the date of grant The fair value determined at the grant date of the equity-settled share based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of shares that will eventually vest

Fair value is measured by use of a binomial model or a Black-Scholes model, according to the relative complexity of the type of share-based payment to be measured The expected life used in the model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioural considerations

17. PENSIONS

i) Defined contribution pensions

The Howden Joinery Group Plc operates a defined contribution scheme for its employees The Company's pension charge for the current year for the defined contribution pension scheme was £52,000 *(2011 £18,000)* There were no outstanding contributions at the year end *(2011 nil)*

ii) Defined benefit pensions

The Company participates in the Howden Joinery Group Plc group retirement benefit plan This is a defined benefit multi-employer arrangement, which operates through a funded pension scheme which provides benefits based on the final pensionable pay of participating employees The assets of the scheme are held separately from those of the Group, being invested with independent fund managers The Company is unable to identify its share of the underlying assets and liabilities of the scheme and accordingly accounts for the scheme as if it was a defined contribution scheme This is the prescribed treatment in FRS 17 "Retirement Benefits"

Further information about the Howden Joinery Group Plc defined-benefit retirement benefit scheme is available in the Howden Joinery Group Plc consolidated Annual Report and Accounts The recent most completed actuarial valuation was carried out at 5 April 2011 by the scheme actuary The actuary advising the Group has subsequently rolled forward the results of the 5 April 2011 valuation to 29 December 2012, and has restated the results onto a basis consistent with market conditions at that date This exercise showed a scheme deficit at 29 December 2012 of £154 5m *(2011 £136 9m)*, before netting off the associated deferred tax asset The roll-forward was done according to the requirements of International Accounting Standard 19 "Employee Benefits" ("IAS 19", under which the Howden Joinery Group reports its results), rather than FRS 17 (under which this Company reports its results) However, management have no reason to believe that there would be any significant difference between a valuation under FRS17 and one under IAS 19

The Company's defined benefit pension charge for the year was £21 0m *(2011 £15 8m)* There are no outstanding contributions at the year end *(2011 nil)*

The Group adopted IFRS with effect from 26 December 2004, and therefore the Group consolidated financial statements disclose pension charges, assets, and liabilities in line with IAS 19 "Employee Benefits" The Group does not believe that there are any material differences between the net pension deficit and the pension charge under IAS 19, compared to under FRS17 It may therefore be useful to users of these accounts to consult the full IAS 19 disclosures given in the consolidated financial statements of Howden Joinery Group Plc
